Hello, WORLD!!

This is JAYPATEL

I am a **WEBDEVELOPER**

/jay2jaykp

EXPERT IN

HTML/CSS

JavaScript

SQL

python

WordPress

EDUCATION

2017-2019

INDUSTRIALENGINEERING

**University of
Toronto**

I am currently pursuing M.Eng Degree from Department of Mechanical & Industrial Engineering with the emphasis on Information Engineering from UofT.

2012-2016

MECHANICALENGINEERING

GTU

I did my undergrad in Mechanical Engineering in Gujarat Technological University (GTU), INDIA.

EXPERIENCE

2017

FREELANCE WEBDESIGNER

I have been learning Web Development out of interest while my undergrad. I got serious about it after arriving Canada.

2015-2016

CAD/CAMDESIGNER

During my undergrad, I did CAD/CAM drawing for some small size firms. I am a proficient CAD software user such as Autodesk Inventor and Autodesk Fusion.

```
>  
Function  
Objective(){  
  console.log(  
    "A self-taught web-  
    developer and a  
    master student  
    looking for a part-  
    time opportunity in  
    web development  
    field to learn more  
    through experience"  
  );  
}
```

Hello,

I am writing this letter to support my intention to apply for the post of part-time Front-End Developer in your ambitious startup. I found this job posting in Career Learning Network Portal of University of Toronto.

I am an international student from India, doing my masters in Industrial Engineering in University of Toronto. I am planning to get certification of Information Engineering by taking courses that focus on Data Analytics, UX/UI design and Information Modelling.

My compassion toward web development started in my undergrad when I first explore the power of web world. After that, I started learning basic HTML/CSS web development with responsive design. I moved from fundamental JavaScript to SQL database and server side programming. Right now, I am learning WordPress development and experimenting with AngularJS and Django to make a single page application as my pet project.

I am currently working on my portfolio-website which eventually will become WordPress compatible theme.

I may not be an experience candidate but I accept all learning-challenge that come across in becoming expert in what I do.

I believe working in a startup would be a great experience for my professional career.

I hope I have conveyed my enthusiasm of joining your team and I hope you will find myself worthy to above stated job posting.

Regards,
Jay Patel
