EDUCATION

2017-2019

INDUSTRIAL ENGINEERING

University of Toronto

I am currently pursuing M.Eng Degree from Department of Mechanical & Industrial Engineering with the emphasis on Information Engineering from UofT.

2012-2016

MECHANICAL ENGINEERING

GTU

I did my undergrad in Mechanical Engineering in Gujarat Technological University (GTU), INDIA.

EXPERIENCE

2017

FREELANCE WEBDESIGNER

I have been learning Web Development out of interest while my undergrad. I got serious about it after arriving Canada.

2015-2016

CAD/CAM DESIGNER

During my undergrad, I did CAD/CAM drawing for some small size firms. I am a proficient CAD software user such as Autodesk Inventor and Autodesk Fusion.

Hello, WORLD!!

This is **JAYPATEL**

I am a **INDUSTRIAL ENGINEER**

/jay2jaykp

Hello,

x

I am writing this letter to support my intention to apply for the TA position in APS106, Fundamentals of Computer Programming. I found this job posting in my university email Newsletters.

I am an international student from India, doing my masters in Industrial Engineering in University of Toronto. I am planning to get certification of Information Engineering by taking courses that focus on Data Analytics, UX/UI design and Information Modelling.

I have completed two masters' courses with the majority of course work was in the python programming language. Therefore, I have become very agile at it.

Besides, python and general BigData Analytics, that I am considering my future career, I am also very interested in Web Development. I am a self-taught web developer with couple of projects to at my disposal.

My father is a high-school principle in India and whenever I got time, I used to go to his school and to exchange some ideas with the young-minds. I may not be a teacher to them but certainly a guide to direct them in right path.

I may not be an experience candidate but I accept all learning-challenge that come across in becoming expert in what I do.

I believe technology has evolve enough and the knowledge of technology in the sense of programming should not be a "skill" anymore but a general knowledge to every human in the path of evolution.

I hope I would be an excellent appointee if get selected. Thank you for your consideration.

Regards,
Jay Patel
